## *The project*

In our seasons project, where we will celebrate each season with different activities, primary school students between the ages of 7-11 will be taught skills such as reading, drawing, writing, presentation, interpretation, language, digital, narrative, drama, etc.

Students will analyze and research information from different sources, their skills will be developed, and they will realize that seasons are a part of our lives.

Activities will enable them to act in groups, work collaboratively, establish positive relationships with the environment, and establish inter-school collaboration. Students will be encouraged to participate in society in a constructive manner.
